

# The Divisibility Rule For TEN Worksheet

By Janine Bouyssounouse

How can you tell if a number is divisible by ten?

Look at the last digit to see if it is a 0.  
If it is, then the number is divisible by ten.

**Example:** The last digit in 17500 is a zero, so it is divisible by ten.

**Example:** The last digit in 640 is a zero, so it is divisible by ten.

**Example:** The last digit in 748 is an eight, so it is *not* divisible by ten.

**Practice Problems:** Circle YES if the number is divisible by ten and NO if it is not divisible by ten.
